

New travel requirements

Effective October 30, 2021, WestJet will implement the federal government's mandatory vaccination policy for air travellers and will operate as a fully vaccinated company.

Phase I

If your clients are travelling between October 30 and November 29, 2021, they will be required to provide proof of vaccination or proof of a valid PCR test.

Phase II

For travel on or after November 30, 2021, only proof of vaccination for guests 12 years or older, with narrow exceptions, will be acceptable for travel onboard all WestJet-operated flights.

As this is a Government of Canada mandate, we are advising to visit <https://travel.gc.ca/travel-covid/travel-restrictions/flying> for the most up-to-date information, including the limited options for exceptions to this new policy.

Travel outside of Canada

We have added a flexible exchange option for air only that allows your clients to obtain a valid COVID-19 test in their connection city. For full details, [click here](#).

Flexible exchange is not applicable for WestJet Vacations packages.

We also advise verifying the entry requirements for your client's destination country to ensure they have the proper documentation before their departure. Visit westjet.com for entry requirements by destination.
